#### **DETAILED ACTION**

#### Election/Restrictions

1. Applicant's election with traverse of Group 1, claims 1-4, 6-8 and 10-15 in the reply filed on 4/24/08 is acknowledged. The traversal is on the ground(s) that the search of the article claims together with the method claims can be made without a serious burden on the Examiner. This is not found persuasive because the search required for the method claims is not coextensive with the search required for the article claims.

The requirement is still deemed proper and is therefore made FINAL.

However, in the event that the article claims are found allowable, pursuant to the procedures set forth in MPEP § 821.04(B the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction would be rejoined and fully examined for patentability under 37 CFR 1.104 provided that the process claims includes all the limitations of a claim that is allowable.

Claims 5, 9 and 16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected method, there being no allowable generic or linking claim.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Application/Control Number: 10/569,204 Page 3

Art Unit: 1794

3. Claims 1-2, 6,8,10 and 15 are rejected under 35 U.S.C. 102(a) as being anticipated by Jarpenberg et al., US 2003/0144643.

The published patent application issued to Jarpenberg et al., teach orienting multi-strand elastic filaments between two non-woven layers (abstract and section 0012). Jarpenberg et al., teach that the elastic strands are fixed at number locations along the at least one of the two non-woven substrate layers (section 0012). With regard to the limitation regarding the plurality of folds, said non-woven substrate layers are gatherable (section 0012). Such gathering would produce the claimed plurality of folds (figure 4). Jarpenberg et al., teach thermal bonding to fix the elastic multi-stands to the gatherable non-woven substrates (section 0047).

## Allowable Subject Matter

4. Claims 3-4, 7 and 11-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Specifically, the prior art of record fails to teach or fairly suggest the limitations set forth in the above claims. An art search did not produce any substantial art for which to base a rejection and presently there is no motivation to combine references to form an obviousness type rejection.

## Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lynda M. Salvatore whose telephone number is 571-272-1482. The examiner can normally be reached on M-F.

Application/Control Number: 10/569,204 Page 4

Art Unit: 1794

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Milton Cano can be reached on 571-272-1398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
